# Put Any Other Tire on the Other Wheel

Here is a simple, practical tire cost test.

It was suggested by one of the world's largest automobile manufacturers.

Buy two new tires—one a "Nobby Tread"—the other any make of tire you choose.

Put both on your rear wheels and check the tire cost of each wheel.

"Nobby Tread" Tires will solve any automobile owner's tire problems the day he decides to buy tires the way experts do, viz:—

## On a Business Basis

Automobile owners everywhere are rapidly learning to buy tires on a real business basis, viz:—the basis of ultimate economy.

And remember this—investigations prove that with "Nobby Tread" Tires punctures are 90% less than with the average tire.

These are the reasons why "Nobby Tread" Tires are today the largest selling high-grade anti-skid tires in the world.

Based upon their remarkable mileage records

**HERE** are five ways in which you get fooled in buying paint;

1. The paint is stuffed out with chalk or something like that.
2. With barytes; better than chalk; doesn't "cover;" you don't know it's there.
3. Benzine, or water, in the oil.
4. Too much liquid, whatever it is, for the solid; paint too thin.
5. Short measure.

Here's one way you can be sure of quality:

Devco Lead-and-Zinc Paint is all paint, full measure; lead, zinc, linseed oil, color and turpentine dryer, and nothing else.
